EDUCATION

University of Southampton

BSc Computer Science

Sep 2024 – Jun 2027

Southampton, UK

- Achieved a Year 1 average of 88% and a Year 2 average of 80% (top 10 in cohort, two years running)
- Relevant Modules: Cloud App Development, AI, Web Technologies, Software Design & Development

St. Mary's Catholic School

A-Levels

Sep 2020 – Jun 2022

Hertfordshire, UK

- Mathematics (A*), Further Mathematics (A*), Computer Science (A*), EPQ (A)

WORK EXPERIENCE

Programmer RA / Technical Lead

TeleAgriCulture

Aug 2026 – Present

Southampton, UK

- Architected and shipped TeleAgriCulture's first customer-facing order pipeline, covering catalogue, cart, order submission, and admin review, launching the research project's first opportunity to drive sales on the project website
- Built a secure admin panel with mandatory 2FA, privilege elevation, full audit logging, and gradual deletion controls, enabling safe production management of users and a fleet of 50+ IoT kits
- Designed a token-based provisioning API that replaced error-prone manual spreadsheets for flashing, and built a resilient bulk data upload feature that has since recovered over 10,000 sensor data measurements from disconnected field hardware
- Modernised a security-vulnerable legacy codebase to now use React 19 and Laravel 13, enforced automated QA with Vitest and PHPUnit to prevent bugs in production, and shipped push notifications with an installable PWA to enhance usability and value to users

Research Analyst Intern

Winchester Housing Trust

Jun 2026 – Jul 2026

Winchester, UK

- Carried out the *Tenant Experience Follow-Up Survey*. The Board's Strategy Day adopted it as the basis for service refinements and ongoing satisfaction monitoring, with the Chair commending it as "an excellent report"
- Designed the survey to isolate tenants' perceptions of responsibility for anti-social behaviour, and analysed the results with Python (Pandas) to surface a clear communication gap, informing the Trust's recommendation to clarify accountability and improve inter-neighbour relations

Store Colleague

Tesco

Nov 2022 – Present

Hertfordshire, UK

- Helped the alcohol department achieve the highest sales of any Tesco store nationally during the Christmas trading week of 2023, maintaining reliability and rapid problem-solving under sustained peak-season pressure

TECHNICAL PROJECTS

Software Engineering Group Project

University of Southampton coursework, 4-person Agile team

Oct 2025 – May 2026

- Scrum Master for a 4-person Agile team building a secure journaling app. Introduced a Git pull-and-merge workflow and automated JUnit testing that kept integration friction low
- Designed a decoupled MVC backend integrating a local, offline NLP model using LangChain4j for semantic topic analysis, keeping sensitive data off third-party services

Java Online Messaging App

Independent project, collaboration with a fellow student

Jul 2025 – Sep 2025

- Built a multi-threaded real-time messaging app in Java using sockets and concurrency for simultaneous client connections
- Implemented a client-server architecture with OOP design patterns for scalable feature growth

SKILLS & INTERESTS

Programming Languages: Java (Proficient), Python, SQL, Haskell, C

Frameworks & Tools: TypeScript, React, Laravel, Tailwind CSS, Vite, Git/GitHub, IntelliJ, VS Code, Maven

Interests: Computer Building, Cooking, Politics, Football / Arsenal
